

## Press Release

### IP500<sup>®</sup> Alliance

## **SMK joined IP500<sup>®</sup> Alliance as Partner**

The SMK Corporation (Japan / Europe) has joined the IP500 Alliance as a strategic partner. The main focus will be the manufacturing of the IP500 / CNX200 RF Modules (Dual Band – announced in 2017 and at CES in Las Vegas 2018). This partnership will expand the global footprint of the IP500 Alliance in the IoT marketplace and will provide highest quality and volumes of the IP500 / CNX200 RF modules.

### **About the IP500<sup>®</sup> Alliance**

The IP500 Alliance is an international industry initiative of leading manufacturers, system integrators and users. The aim of the Alliance is to jointly define, develop and provide a manufacturer-neutral standard and most secure global IoT wireless platform for smart commercial buildings.

The IP500 platform guarantees maximum interoperability for the interdisciplinary and interdepartmental interplay of different smart IoT devices by using central, generally introduced and accepted industrial IoT standards. The IP500 standard is also the first and only wireless platform that meets security regulations according to DKE, EN and VdS for commercial building. It therefore ensures most robust communication between security and comfort applications such as smoke detection, intrusion / access control as well as light and motion sensors.

The IP500 Alliance is represented globally in Europe (Headquarters), USA, India & Asia.

**Berlin, 19<sup>th</sup> March, 2018**
